

PIPE COVERS - 9100

Pipe covers prevent rain, dirt and foreign objects from accumulating in the discharge pipe of safety relief valves and are brightly colored to indicate when the relief valve has been actuated and the cover blown off.

Economy pipe covers are available in straight or angle cuts, and are made of raincoat material. Premium covers are available only in angle cut, and are made of polyurethane. Sizes range from ½" to 14". Tethers are available upon request.
